

IAGO Hauptwerk Virtual Pipe Organ Open Houses

Saturday, March 16

Drop in either place whenever fits your schedule:

Noon--2:30	3 Etna Lane in Etna	Erik Kibelsbeck
2:30-4:30	474 Snyder Hill Road	Gerald Wolfe

I'll have refreshments at my place, so skip lunch if you like!

Closer in will ask for some sense of who can make it. (if not a good date for you and you're interested, I'm happy to arrange another time for you, and suspect Gerald would as well.)

Directions:

Erik: 3 Etna Lane—from Ithaca pass NYSEG on 13, then make the first left onto 366, then the first right onto Etna Lane. First house on left, cream color with green trim. ***When leaving, it's safer to go to the other end of Etna Lane and turn right to get back onto 13. 607 725-1334 if you need help!

Gerald: 474 Snyder Hill Rd., at the top of the hill, 2 miles up from Pine Tree Rd., or 1 mile up Quarry Rd. from Ellis Hollow Rd.

About the Instruments, which like organs in general are rather different:

Gerald has a very workable setup done on a sensible budget...two manuals and pedal, with sample sets from Piotr Grabowski

I've gone with a three manual Austin console, touch screen controls, and audio interface with multiple speakers. Besides the free English organ included with Hauptwerk, will have the 1730 Trost organ sample set. Depending on cash flow, hope to also have Hereford Cathedral Willis by then.
